The Fish Hatchery Next Door... A Salmon in the Classroom Educator's Guide

...is designed to help you make a successful visit to a fish hatchery with students of all ages. Prior to your visit please take time to familiarize your group with the basic concepts outlined in this guide - read the materials (especially chapter 1), and involve your students in the activities. Make the units and materials work for you and your class. This guide will provide some of the key elements to ensuring a safe, educational, and enjoyable hatchery visit.

The Washington Department of Fish and Wildlife is responsible for managing over 500 species of fish, birds, and mammals. Fish hatcheries play an important role in maintaining the balance between human demands and the needs of Washington's diverse wildlife. Thank you for your interest and investment of time to learn more about the part fish hatcheries play in managing Washington's aquatic and marine resources.

ACKNOWLEDGMENTS

This publication is a Washington State edition of the Oregon Department of Fish and Wildlife's, "The Fish Hatchery Next Door ... An Educator's Guide."

The Washington Department of Fish and Wildlife wishes to thank the authors of and contributors to ODFW's "The Fish Hatchery Next Door ... An Educator's Guide" for permission to use their publication as a template for this publication.

The Department recognizes and thanks the following organizations for their active partnership and funding support in providing learning opportunities and educational resource materials to Washington's school children.

- ◆ Seattle Public Utilities (SPU) administers the Seattle School District component of the Department of Fish and Wildlife's Salmon in the Classroom Program. SPU funds teacher training, classroom salmon-rearing equipment, and educational field trips for participating schools.
- ◆ King County Water Quality Block Grant Fund contributed to this project by helping to underwrite the printing costs; and, finally,
- ◆ Steve Bell and the Friends of Issaquah Salmon Hatchery (F.I.S.H.) who provided the impetus for this project and the unflagging enthusiasm to see it through to completion.

CONTENTS

Introduction

1. Preparing for a Hatchery Visit

How to Use This Guide (background)	6
Keeping a Student Journal (background)	11
Developing a Code of Behavior (background)	12
Teacher/Leader Checklist for a Hatchery Visit (background)	14
Taking Note of Fish and Wildlife (activity)	81
Hatchery Manners (activity)	84

2. Introduction to Watersheds and Salmonids

The Origin of Puget Sound and the Cascade Range (Tribal Legend)	18
A Short Course on Watersheds (background)	20
What Are Salmonids? (background)	29
Water - The Constant Traveler (activity)	89
Finding Your Ecological Address (activity)	95
Tyee's Magnificent Journey (activity)	109

3. The Salmonid Life Cycle

A Natural Anadromous Salmonid Life Cycle (background)	32
Salmonids At the Hatchery (background)	40
Comparing Natural and Hatchery Raised Salmonids (activity)	139
Hooks and Ladders (activity)	143

4. Fish Habitat Needs

Habitat: The Key to Survival in the Wild (background)	46
Home Wet Home (activity)	153
Riffles and Pools (activity)	157

5. Designer Fish by Mother Nature

How Fish "Work" (background)	52
Aquatic Ecosystems (background)	55
Recognizing Hatchery Fish (activity)	167
Fashion a Fish (activity)	171
Fish Lunch Box: Aquatic Insects (activity)	177

6. Fish Culture Meets Human Culture

The Hatchery Idea (background)	62
Managing for Fish and Fishers (activity)	183
A Day Working at a Hatchery (activity)	189
Getting Fish Out Of, and Into the Hatchery (activity)	197
Designing Hatcheries With Genes in Mind (activity)	201

7. After the Hatchery Visit

Extending Your Study (background)	70
Columbia River Salmon: Legends and Stories of the 23rd Century (activity)	211
Hatchery Times (activity)	217
